

# SaunaBoat 10

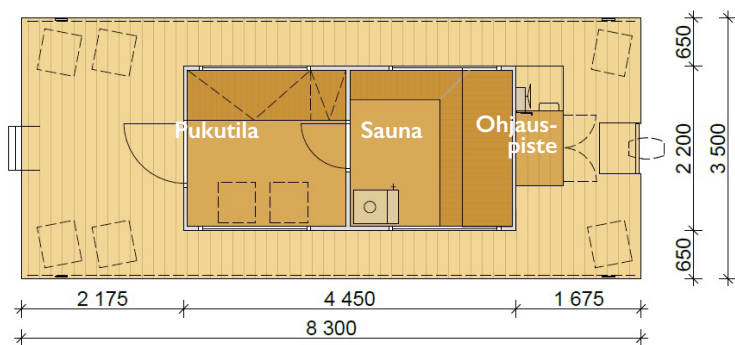

The SaunaBoat is a clever twist on the traditional sauna. The smaller model, SaunaBoat 10, is an 8.3m long boat with 10m<sup>2</sup> of indoor space. It is ideal for family use and can be fitted with a sleeping cabin instead of sauna if preferred. It also enjoys plenty of outside deck area. With the boat package, which is available as an extra feature, the SaunaBoat 10 is a CE-certified boat

The cabin is of timber construction and sits on a timber deck. The sauna relies on a traditional wood burning stove. The cabin is mounted on a hot-dipped steel framed platform with plastic tubes.

The SaunaBoat is strong but light in weight, can be transported by road if necessary and is smooth and stable on water. It is easily and safely handled when fitted with an outboard engine of 15-20hp.

## Layout

## Technical information

- **Floating base 29 m<sup>2</sup>**  
Hot dipped galvanized steel frame  
Treated pine deck
