

# SaunaBoat 14

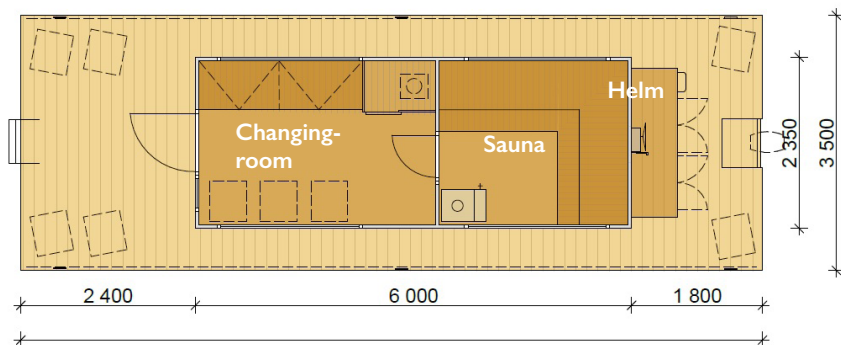

The SaunaBoat is a clever twist on the traditional sauna. The larger model, SaunaBoat 14, is a 10.2m long boat with 14m<sup>2</sup> of indoor space. This is divided into two rooms, i.e. a sauna, dressing room, and a separate toilet cabin. Capable of hosting up to 12 people, it is flexible and sufficiently spacious for occasional overnight accommodation. SaunaBoat 14 boasts a good sized terrace with space for sunbathing and a barbecue. With the boat package, which is available as an extra feature, the SaunaBoat 14 is a CE-certified boat

The cabin is of timber construction and sits on a timber deck. The sauna relies on a traditional wood burning stove. The cabin is mounted on a hot-dipped steel framed platform with plastic tubes.

The SaunaBoat is strong but light in weight, can be transported by road if necessary and is smooth and stable on water. It is easily and safely handled when fitted with an outboard engine of 20hp.

## Layout

## Technical information

- **Floating base 36 m<sup>2</sup>**  
Hot dipped galvanized steel frame  
Treated pine deck  
Pontoon with plastic tubes T500, 4 pcs
